Budget Utilisation by Ministry

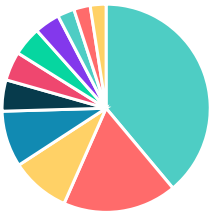

This chart tracks budget performance across 49 government ministries by comparing how much money was appropriated (budgeted), how much has actually been spent so far, and how much has been released for the current year. The Federal Ministry of Budget and Economic Planning received the largest appropriation at approximately 9.2 trillion naira, while smaller agencies like the Code of Conduct Tribunal received only about 606 billion naira. A significant pattern emerges across nearly all ministries: the amount spent to date is

substantially lower than both the total appropriation and the amount released, suggesting that many departments are sitting on released funds without fully deploying them. For example, the Federal Ministry of Agriculture and Food Security has spent only 616.8 billion of its 2.1 trillion naira appropriation, leaving roughly 70 percent of budgeted resources either unspent or not yet released. This widespread underutilization could indicate bottlenecks in project execution, delayed spending decisions, or capacity constraints that merit further investigation to ensure taxpayer resources are being deployed effectively.

FEDERAL MINISTRY OF F... (4.9%) FEDERAL MINISTRY OF H... (4.5%) FEDERAL MINISTRY OF S... (4.5%) FEDERAL MINISTRY OF E... (4.0%)
FEDERAL MINISTRY OF W... (2.6%) FEDERAL MINISTRY OF D... (2.6%) Others (2.4%)

This pie chart displays budget appropriations across 49 government ministries and agencies, revealing a highly concentrated distribution of funds. The Federal Ministry of Budget and Economic Planning receives the largest allocation at approximately 9.2 trillion naira, while smaller agencies like the Code of Conduct Tribunal receive only about 606 billion naira—a gap of over 15 times. Major sectoral ministries show substantial disparities: Agriculture and Food Security receives 2.1 trillion naira, while critical sectors like Aviation receive only 100 billion naira and Industry, Trade and Investment receives 79 billion naira. The concentration of resources in a few ministries, particularly budget and economic planning along with the Federal Capital Territory Administration (465 billion naira), suggests that policy priorities are heavily weighted toward administrative and planning functions relative to service delivery sectors, which may merit review to ensure alignment with stated
